UK Settled Status – Full right to work, no sponsorship required

PROFILE

Recent Computer Science graduate with hands-on experience building production-deployed backend applications, data pipelines, and contributing to major open source projects. Skilled in Python, Django, SQL, dbt, Airflow, and test-driven development. Seeking a junior backend or data engineering role in London. Languages: English (Fluent), Greek (Native).

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend: Django, Django REST Framework, FastAPI, PostgreSQL, Redis, Celery

Data Engineering: dbt, Apache Airflow, Apache Kafka, DuckDB, Dimensional Modeling

Tools & Testing: Git, Docker, pytest, Render, Railway, Linux

OPEN SOURCE CONTRIBUTIONS

DefectDojo — Vulnerability Management Platform (3.7k+ ★) • [PR #13805](#) Merged

- Implemented lazy loading using Python's `@cached_property` decorator to defer expensive database COUNT queries
- Resolved critical performance issue where edit finding operations took 50+ seconds on systems with 100k+ findings
- Approved by 4 maintainers, passed 150 CI checks, merged into release v2.54.0

Django Ninja — Fast REST Framework (8.8k+ ★) • [PR #1614](#) Merged

- Fixed optional query parameter validation bug affecting Pydantic v2 by implementing automatic `Optional[T]` wrapping
- Utilised existing `is_optional_type()` utility, added regression test coverage, and ran full 667-test suite

django CMS — Enterprise Content Management (10k+ ★) • [PR #8418](#), [#8420](#) Merged

- Fixed `TemplateSyntaxError` crash when templates use `{% extends CMS_TEMPLATE %}` by adding exception handling in `_scan_placeholders()`
- Added regression tests for page tree copying with apphooks; iterated through multiple code review rounds with maintainers

PROJECTS

BudgetBox Analytics Pipeline — Data Engineering Platform • [GitHub](#)

- Built end-to-end pipeline with batch and real-time Kafka streaming, processing transactions into DuckDB warehouse
- Designed star schema with dbt (7 models, 65 data quality tests) following staging, intermediate, and marts architecture
- Implemented Airflow DAG orchestrating parallel API ingestion with automated dbt transformations
- Created Streamlit dashboard with Plotly for spending analysis and trend monitoring

BudgetBox API — Personal Finance REST API • [Live Demo](#) • [GitHub](#)

- Built REST API with 48 endpoints using Django REST Framework for multi-account management, transaction tracking, and budget planning with multi-currency support
- Implemented token authentication, user data isolation, and 1,015 lines of pytest test coverage
- Designed budget recommendations based on spending patterns, atomic transfers, and response caching

EDUCATION

BSc Computer Science (2:1)

City St George's, University of London • September 2022 – June 2025

Relevant modules: Databases (73.5%), Web Development (85.6%), Data Structures and Algorithms, Computer Networks, Object-Oriented Analysis and Design, Cloud Technology for Business Transformation

BTEC Level 3 Extended Diploma in Computing (DDD)

London South East Colleges • September 2020 – June 2022

EXPERIENCE

Personal Shopper

Ocado, London • March 2020 – Present

- Consistently ranked in top 10 performers for product scanning accuracy and efficiency over 4+ years
